IAC

6 REASONS TO
PURSUE YOUR NET-ZERO STRATEGY
WITH AUTOMOTIVE CUTTING ROOM 4.0

VECTOR

01

Reduce **fabric waste**

- ☑ **Achieve 1%** fabric savings for every 1mm reduction in cutting buffer.
- ☑ **Near 0-buffer** cutting minimizes fabric waste and reduces landfill shipments.

02

Reduce **material consumption**

- ☑ Increase your material savings by **up to 5%.**
- ☑ Improved **cutting head and sharpening systems.**

03

Reduce **waste, errors, scrap rate, and re-work**

- ☑ +1 point increase in fabric yield = **5% waste reduction.**
- ☑ Advanced cutting technology and built-in blade management system for **high precision cutting.**

04

Reduce costs on **consumables**

- ☑ Attain **up to 7% increase in cost savings** if you change your consumables every 1,000 hours instead of 500.
- ☑ Long-lasting consumables help you **save time and money on repairs** and reduce machine downtime and disruption.

05

Reduce **equipment downtime**

- ☑ **Gain up to 98% machine availability** with remote monitoring and automated alerts.
- ☑ **Improve uptime** with remote technical support & anti-error systems.

06

Achieve your **sustainable goals**

- ☑ **Lower your carbon footprint** by reducing fabric waste.
- ☑ Ensure a safe place to work with **new safety radar** and **ergonomic design.**
